

HIGH PERFORMANCE

DESMOTRONIC

Desmotronic
Art.-Nr.: **MD673** Fitness

Length cm	Width cm	Height cm	Weight kg
250	105	140	500

Functionality

The DESMOTRONIC is a computer-controlled leg press with the latest robot technology. Extremely fast, strong and precise.

Technological and mechanical engineering - a masterpiece! Their main area of application is high-performance sport and research. Further details regarding technology, software, training and references are available on request

Properties

- Maximum slide speed: 1200 mm / s
- dynamic with sinusoidal speed
- dynamic at linear speed
- isometric / static
- isokinetic

Study Excerpt

"The system, which works according to the desmodromic principle, recruits more and more fast muscle fibers to an interindividually varying extent and increases the lactate mobilization highly significantly after only 6 weeks compared to conventional exercise systems." Source: UNI Heidelberg - publication on request

Device Setting

- Infinitely adjustable start position
- Infinitely adjustable backrest angle
- Infinitely adjustable neck pad
